DR

“ *Dr Kelley was an amazing physician and an amazing friend! We were both space cadets with a love for the space program and anything to do with it. We participated in Nasa biology research and published a paper together on effects of radiation. He was a brilliant guy, but was humble as well. He'll be sorely missed! Fair wins and following seas, my friend.*

Dennis Rowley - April 06 at 07:53 AM

AK

Dr. Rowley, you're kind words for my father mean so much. He spoke often and fondly of you.

Alyce Kelley - May 05 at 02:38 AM
